Curriculum Vitae

Summary

I'm a 28 years old brazilian guy, who loves sports, living in Porto for over 5 years. During my time in Portugal, I have complete a Master's degree and I'm currently in the final stretch of my PhD. Throughout my academic journey I have learned a set of abilities related to solving problems and generating insights from data using scientific and computer programming tools, and that turned out to be my favorite part of the job. Nowadays, my main career objective is to act as a full-time data scientist in order to put into practice in the job market the knowledge and skills acquired during my Master's and PhD.
